

HERBEN DRY STAMP

DryStamp is a precision engineered instrument to provide you with the ultimate returns on investment in the form of a unique 'DRY INK' numbering system.

DryStamp incorporates **DryRib**, a carbon charged poly film ribbon, a proven system used in the security printing and packaging industry for over four decades.

DryStamp offers you the following proven features and benefits previously afforded only to the professionals in the security cheque printing and packaging industry.

DryStamp is unique in it's design, size, mobility, construction, use of material and finish to deliver only highest grade quality results every time.

DryStamp is a robust construction of steel housing no fewer than 16 quality ball and needle roller bearings ready for use in the most demanding industrial applications.

DryStamp is designed as a retrofit able attachment for various types of free standing as well as in-line printing, packaging, coding and finishing systems.

DryStamp offers you the feature of being user friendly, versatile and reliable backed up with a 1-year international warranty.

DryStamp numbering wheels stay free of ink and lint so colour changes are instant without the need to ever again having to 'wash-up' previously used colours.

DryStamp can be used to crash number multiple sets with clear results, no other markings on base sets and without fear of damage to the hardened steel wheels.

DryStamp can also be used as the first ever hand activated professional DRYINK, high-grade quality numbering system.

DryStamp has a special numbering indexing mechanism, which is factory set, tested and should never need any adjustment.

DryStamp could become your most reliable business partner for years to come by offering the ultimate in crisp, clean, clear, legible, quality numbering.

DryStamp comes standard with 6 hardened steel wheels with the industry standard engraved font of 3116" (4.75mm) gothic characters.

DryStamp can be extended at any time to print up to 7 characters, which you can fit when required in either forward or backward sequence.

DryStamp makes it easy for you to interchange wheel sets from forward to backward sequence wheels that are available as standard stock items.

DryStamp can be fitted with Alpha wheels from A to J, K to R and S to Z.

DryStamp can be made to order (subject to quantities) for any complex applications with a range of fonts available subject to copyrights.

DryStamp can be fitted with a large range of repeat, skip, security Modulus wheels and a unique range of book & page numbering sequences.

DryStamp is your passport to cover your future numbering needs, treat it with respect and it will serve you well beyond your current expectations.
